Survey

Survey Introductory Text

Over the course of your checkpoint submissions for the AI Implementation assessment, you received feedback in both video and text format. The video showed your instructor's thoughts and comments unedited, while the text was generated by cleaning the audio of your instructor's comments using AI, to give you a cleanly structured and formatted version of that same feedback.

The purpose of this survey is to investigate your views on these two approaches for feedback.

Completing this survey is optional. If you choose to complete this survey, all questions are optional. The survey should only take around 10 minutes. All survey responses will be completely anonymous. If you opt to sign up for a follow-up interview, you will be taken to a new page to give your contact details. So you would not have to add your details with the survey.

To thank you for your participation, students who complete the survey will enter a draw to win one of two $20AUD gift vouchers! To enter the competition, you must provide your university email via a separate link that will be provided on the survey. Your email will be solely used for the purposes of contacting you if you win. Your email will not be used for research or included in published data.

The results of this survey may be used in research publications. If you have any questions regarding this, or any questions in general, please refer 'Participant Information Sheet' (linked here).

Survey Questions

When you received feedback for each checkpoint, which format did you typically look at first?

- The AI-structured text feedback
- The video feedback
- I can't remember

How did you engage with the video feedback? (Select the option that best describes you)

- Watched the full video attentively
- Watched the full video but with divided attention
- Skimmed through / skipped to specific parts
- Barely watched it
- Didn't watch it
- I can't remember

How did you engage with the AI-structured text feedback? (Select the option that best describes you)

- Read the full text carefully
- Read the full text but quickly
- Skimmed the main points

- Barely read it
- Didn't read it
- I can’t remember

While working on later checkpoints, did you go back to feedback from earlier checkpoints? (Select all that apply)

- Yes, I rewatched parts of the video(s)
- Yes, I re-read the text
- No, I didn't go back to either
- I can’t remember

Did your engagement with the two formats change across the checkpoints?

- No, I engaged with them the same way each time
- Yes, I relied more on the video as the checkpoints progressed
- Yes, I relied more on the text as the checkpoints progressed
- Yes, I engaged less with both as the checkpoints progressed
- Other: _____

For each of the following, please indicate which format you found more useful or which felt stronger. Choose the best single answer.

Understanding what you did well

- Video / Text / About the same / Neither

Understanding what needed improvement

- Video / Text / About the same / Neither

Knowing what specific actions to take next

- Video / Text / About the same / Neither

Feeling that the instructor had genuinely engaged with your work

- Video / Text / About the same / Neither

Trusting that the feedback accurately reflected your work

- Video / Text / About the same / Neither

Feeling motivated to act on the feedback

- Video / Text / About the same / Neither

If the video and text gave you slightly different impressions, which one felt more trustworthy?

- Video / Text / They never gave me different impressions / They did differ, but I trusted them equally

Rate each format on the following (1 = not at all, 5 = very much)

The VIDEO feedback was:

- Clear and easy to follow [1–5]
- Useful for improving my next submission [1–5]
- Credible and accurate [1–5]
- Encouraging rather than discouraging [1–5]

The AI-STRUCTURED TEXT feedback was:

- Clear and easy to follow [1–5]
- Useful for improving my next submission [1–5]
- Credible and accurate [1–5]
- Encouraging rather than discouraging [1–5]

To what extent do you feel the feedback you received on earlier checkpoints helped you produce better work on later checkpoints than you would have without it? (1 = not at all, 5 = a great deal)

How valuable was receiving both formats together, compared to if you had received only one?

- Much more valuable than one alone
- Somewhat more valuable than one alone
- About the same as one alone
- Actually less valuable — one alone would have been better
- Unsure

If you were to choose the format of feedback going forward, which would you pick?

- Video only
- AI-structured text only
- I would want both
- Neither

How did you feel knowing AI (MS Copilot) was used to structure the text feedback from the instructor's spoken commentary?

- It improved the feedback: made it clearer and easier to use
- It didn't really affect how I felt about the feedback
- It undermined the feedback: made me trust it less
- I'd prefer feedback without AI involvement

The unedited nature of the video feedback — pauses, 'ums, thinking aloud — made it feel more authentic to me. *(1 = strongly disagree, 5 = strongly agree)*

Is there anything about either feedback format that stood out to you — positively or negatively — that wasn't captured above? *(Optional free text box)*

This information helps us understand whether different student backgrounds experience feedback differently. All responses remain anonymous.

Enrolment:

- Undergraduate (BMET2925)
- Postgraduate (BMET9925)

Student status:

- Domestic
- International (full-time at USyd)
- Study abroad / exchange

Is English your first language?

- Yes
- No

(If no to previous quesiton) How would you rate your English proficiency?

- Basic / Intermediate / Advanced / Near-native

Gender:

- Female / Male / Non-binary or self-describe/prefer not to say
